Specification Motor terminals for enameled wire

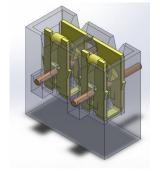

Description Escubedo offers the UP-MATE family for magnet wire termination for a quick motors and coils connections. The strip form female can be

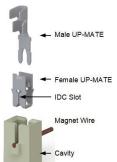

inserted fully automatic into cavity.

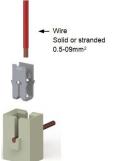

During this operation, the magnet wire is inserted into slot, strips the insulation film an finally it remains under a constant pressure against the slot side walls.

This insertion-wiping action between wire and the terminal slot walls removes any oxid or impurities on all contact surfaces producing a clean stable electrical connection
